

Matteo Cardellini

App Developer

Hi! I'm Matteo, I'm a passionate developer who is constantly looking for new things to learn and methods to improve himself. Technology and science are my two great passions.

I'm an Engineering student at Unige by day and a freelance developer by night at my own company SmileApp

02/2017 - present

Scientific Highschool
Liceo Scientifico C. Colombo
2010 - 2016 | 90/100

Bsc Computer Engineering
University of Genoa
2016 - present

Reviews

“ Sablono and I personally, welcomed Matteo already two times in our office at Berlin. He is a very passionate and smart developer with high self motivation to quality and elegance on the work he delivers - on paper and digital.

I'm highly recommending him as front end developer and engineer but I also see a high potential on other coding topics.

I wish you all the best and hope to welcome you another time in Berlin.

Mathias Bergmann
Software Developer, Sablono GmbH

“ I've worked with Matteo during his internship at Sablono, in Berlin. He is not only a talented developer and good learner, but also a very nice person to work with. He always has very good ideas and delivers good quality work, and also knows how to work in a team.

He has high potential, and is always curious about new technologies and tools.

I totally recommend him.

Belèn Agüeras Angulo
Senior Frontend Engineer, Sablono GmbH

Working Experiences

Freelance Developer

02/2015 - Present

Angular HTML LESS
Cordova/Ionic NodeJS

SmileApp

Genoa, Italy

As soon as I turned 18 I started my own freelancer activity, SmileApp, building mobile applications and websites for stores and companies in my hometown, Genoa. In my portfolio I have many clients, among which stand out an important phone reseller, Stylecar, with over six thousand clients registered in the application that I built, and a medical and dentistry conference organiser, e20, with more than forty thousand clients all over Italy.

Front End Developer, Intern

07/2016 - 09/2016

NodeJS Socket.io GCM APNs

Sablono GmbH

Berlin, Germany

My amazing experience at Sablono and the awesome people that I met during the previous summer were the reason I decided to come back in the summer of 2016 to work again at Sablono. This time, besides building the Sablono platform, I also led some side projects, that has been later implemented in the main workflow, implementing a live communication between the web platform and the mobile application using NodeJS and Socket.io and a system of push notifications through APNs and GCM.

Front End Developer, Intern

06/2015 - 09/2015

Angular HTML LESS
Cordova/Ionic

Sablono GmbH

Berlin, Germany

Sablono is an IT Company based in Berlin which provides a web application for construction companies to easily track their progress across multiple construction sites. My work was to build clear and efficient user interfaces for the web application employing AngularJS as the main framework. This experience made me really understand the working environment and how big teams operate together to achieve a common goal through methods like Git for the versioning and publishing control and the Agile Method Scrum for managing the product development.

Professional Skills

HTML, CSS, Javascript
Expert, 4 years

I'm able to build beautiful and responsive websites with complex layouts using HTML5, LESS and Javascript.

AngularJS
Expert, 3 years

Able to implement a complete user interface in the form of a mobile and desktop web app, with a focus on performance and design.

Java & Android
Proficient, 1 year

As an Udacity student I've been taught the fundamentals of Android and all the steps needed to follow the Android Design Principles

Other Skills

LESS Git PHP MySQL NodeJS Ionic
C++ AWS Scrum Grunt npm Italian English
Photoshop Illustrator
